Bring your music with you around the house; signals go through walls and doors

Thanks to innovative 864 MHz RF technology you can bring the portable and completely cordless SBC BC8310 anywhere around the house or garden and enjoy the best in sound quality, even up to 100 meters away from the music source. That's because the transmission signal received by the SBC BC8310 goes through walls and doors and is not affected by other RF-operated appliances. You can also add more of these speakers to the system to give you music wherever you go!

Completely cordless speaker that works on 864 MHz RF technology

for high-quality, interference-free sounds anywhere in and around the house

Rechargeable system

gives up to 12 hours of music on NiCd batteries for cost-effective operation

Operating range up to 100 meters

giving you excellent sound quality anywhere around the house or garden; signals go through walls and doors

Battery condition indicator

indicates how much power is left in your batteries

Auto Power off

automatically switches off the speaker when the transmitter is turned off

Dynamic Bass Boost

for enhancing deep, rich sounds

Bass Reflex system

ensures excellent sound quality, especially in the bass region
